

ANIME & MANGA

OBJECTIVES

Club Members will examine the various aspects of Japanese culture as seen in the art of anime & manga. The many different genres allow individuals unique ways to express themselves through their own related creative art, video and costume making. Some may wish to further delve into and absorb Japanese history, folklore, & language, both written & spoken in these various formats. Others may enhance their sense of personal development by studying & creating Japanese food, dressing in an otaku sense of style & adapting to the social mannerisms as portrayed in this artform.

The emphasis is on fun and cooperative activities, while allowing members to enhance their public speaking, personal creativity & inter-personal skills. There is no competition for this club.
