

## PowerPoint Presentations:

You will be assigned a room with a laptop and projector.

If you have your presentation on a website or a google doc account, the 4-H Center has Wi-Fi and you may access it through the Wi-Fi.

However, our laptops only have PowerPoint 2003, so your document must be saved as a 2003 version to play correctly.

We strongly recommend that you put your presentation on a memory stick in case you can't access it through our Wi-Fi

If you choose to bring your own device (laptop, tablet or smartphone) we do not guarantee it will connect to our projectors. In that case, you must bring all of your own equipment.
