Poultry Breeding Project (Optional)

Use this form to record breeding project(s). You may use separate pages for breeding records by pen or list all on the same page.

Many project members choose to include breeding as part of their 4-H project. If you have chosen to breed your birds, use the chart below to keep a record of the birds bred and their hatchlings.

Date bred	**Breed and band number**	**Hatching date**	**Hatchlings**		
			# of chicks	**Remarks**	**Disposition (sold or added to flock)**
Example: 10/3/01	Rhode Island Red #2410	10/15/01	6	1 mortality sexing: 2 cocks, 4-Hens	Added to flock

(You may add more copies of this page if necessary.)

Monthly Egg Production Summary (Optional)

Record the number of birds you began the month with by breed, total number of eggs, the average number of eggs per bird by breed, and income (estimate income if eggs used for home). This record will assist with determining your flock's health status, which breed(s) is producing best, and how management of the flock affects egg production.

Month	Breed	# of birds (start of month)	Total # of eggs	Avg. # of eggs per bird	Income (estimated or real)
				Total Income from Eggs	

(You may add more copies of this page if necessary.)
